Art Unit: 1634

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1, 2, 4-10, and 16 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Gendler et al (J. Biol. Chem. 265: 15286 (1990)). This rejection is repeated for reasons already of record (*e.g.*, Office action mailed August 10, 2007, page 4, first full paragraph). Applicants' argument (response filed December 10, 2007, pages 8-9) is not convincing. The passage referred to by applicants is taken out of context. It is clear from the full discussion in Kennell at page 261, first full paragraph that the mismatched pairs need to occur within the region of complementarity. The alignment of SEQ ID NO: 36 with Gendler et al shows 298 contiguous matching nucleotides between the two sequences (*e.g.*, see the alignment on pages 4-5 SEQ ID NO the Office action mailed August 10, 2007). The discussion in Kennell in the paragraph bridging pages 260-261 makes clear that a duplex of this length has maximum stability and thus would hybridize (and remain hybridized) under stringent nucleic acid molecular hybridization conditions.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gendler et al (J. Biol. Chem. 265: 15286 (1990)) in view of applicants' admitted state of the prior art (*e.g.*, instant application, page 42, line 8 through page 43, line 7). This rejection is repeated for reasons already of record (*e.g.*, Office action mailed August 10, 2007, page 5). Applicants' argument (response filed December 10, 2007, pages 9-10) is not convincing. The discussion of Gendler et al in the rejection under 35 U.S.C. § 102(b) is incorporated here.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Gendler et al (J. Biol. Chem. 265: 15286 (1990)) in view of An et al (U.S. Patent No. 6,218,529). This rejection is repeated for reasons already of record (*e.g.*, Office action mailed August 10, 2007, paragraph bridging pages 5-6). Applicants' argument (response filed December 10, 2007, pages 10-11) is not convincing. The discussion of Gendler et al in the rejection under 35 U.S.C. § 102(b) is incorporated here.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1634

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
